- REACT NATIVE

✍PROJECT

1.Newspaper Application using React Native

* Developed a dynamic newspaper application using React Native, leveraging JSON data from a newspaper API to provide realtime news updates.

* Implemented a responsive UI with the FlatList component to display news articles, ensuring smooth and efficient content consumption.

*Enhanced user navigation through the incorporation of a Bottom Navigation bar, enabling seamless transitions between app sections.

*Demonstrated proficiency in API integration, UI design, and navigation implementation.

2.To-Do List App using React Native

*Developed a feature-rich To-Do List application using React Native, showcasing understanding of state management.

* Utilized useState and useEffect hooks to create a responsive and dynamic user interface, allowing users to add, update, and remove tasks.

*Illustrated competence in managing state and user interactions for a more engaging app experience.

3.Tour Budget Tracker with React Native

*Engineered a user-friendly Bottom Navigation interface for smooth navigation across various app screens.

*Integrated Firebase to enable real-time synchronization of travel expenses and budgets, showcasing skills in Firebase integration.

*Explored advanced state management with Redux, gaining insight into handling complex data flows within multi-screen   applications.

4.Weather Application Using Weather API

*Developed a sophisticated weather application using React Native, seamlessly integrating real-time weather data through a dedicated weather API.

*The application provides users with up-to-date weather forecasts and conditions at their fingertips.

TOOLS

- VSCode
- Postman
- Google Firebase
- React native expo
